

School Waste Education Sessions

The City of Bunbury provides a wide range of free waste education sessions for schools and early learning centres. The sessions are designed to educate students about how waste and recycling impacts the environment and how they can reduce their waste and better use their bins at home and at school.

The program consists of a range of different waste education sessions which can be adapted for kindy to Year 6 students. Sessions can be tailored to suit the needs of your group and topics can be combined to suit your specific questions about waste. All our Primary school activities have also been mapped to the national curriculum.

Topics include but are not limited to:

Why is Recycling Important (Early learning to Year 2)

Follow the adventures of Michael Recycle, the green caped crusader.

My 3 Bins (Early learning to Year 6)

Using the 3 bin service and why it is important to put things in the right bin.

What a Load of Rubbish (Year 2 to Year 6)

Find out what happens to the waste you place in your bins once it leaves the kerb.

Waste Free Lunch Boxes (Year Kindy to Year 6)

Tips on minimising lunch box waste.

How to make Compost (Year 3 to Year 6)

Children learn about what compost is and made of and get to make their own mini compost.

How to Build a Landfill (Year 3 to Year 6)

Children learn about what happens to their waste once they throw it away and get to build their own mini landfill.

Waste Audits (Year 4 to Year 6)

Find out how much and what type of waste your school/class produces.

Support for planning actions to reduce the school's waste, improve recycling systems, start a new collection or apply for grant funding.

For more information contact our Waste Education Officers on 9792 7333.
